## NEW! AT-1000Pro

Building on the success of the AT-1000, LDG Electronics has refined and expanded its 1KW tuner. The AT-1000Pro has an Automode that automatically starts a tuning cycle when the SWR exceeds a limit you set. Other features include:

- Operates at any power level between 5 and 1,000 watts peak. RF Relay protection software prevents tuning at greater than 125 watts.
- 2 Antenna connections
- Tunes from 1.8 to 54.0 MHz (inc. 6 meters)
- Tuning time usually under 4 seconds, transmitting near a frequency with stored tuning parameters, under 0.2 seconds.
- 2000 memories.
- All cables included.

***Suggested Price $599***

*radio not included*

## AT-897 for the Yaesu FT-897

If you own a Yaesu FT-897 and want a broad range automatic antenna tuner, look no further! The AT-897 Autotuner mounts on the side of your FT-897 just like the original equipment. We even added the ability to mount the "feet" on the side of the tuner so when you're transporting your rig by the handle, you can safely set it down and not worry about scratching the case. The AT-897 takes power directly from the CAT port of the FT-897 and provides a second CAT port on the back of the tuner so hooking up another CAT device couldn't be easier. ***Suggested Price$199***

## AT-100Pro

This desktop tuner covers all frequencies from 1.8 – 54 MHz (including 6 meters), and will automatically match your antenna in no time. It features a two-position antenna switch, allowing you to switch instantly between two antennas. The AT-100Pro requires just 1 watt for operation, but will handle up to 125 watts. All cables included. ***Suggested Price $219***

## AT-200Pro

The AT-200 features LDG's new "3-D memory system" allowing up to eight antenna settings to be stored for each frequency. Handles up to 250 watts SSB or CW on 1.8 – 30 MHz, and 100 watts on 54 MH (including 6 meters). Rugged and easy-to-read LED bar graphs show power and SWR, and a function key on the front panel allows you to access data such as mode and status. All cables included. ***Suggested Price $249***

*radio not included*

## AT-7000

The AT-7000 is the ideal tuner for IC-7000 & other Icom Radios: Covers all frequencies from 1.8–54 MHz (including 6 meters), and will automatically match your antenna. Requires just 0.1W for operation, but will handle up to 125W (100 W on 6 m), making it suitable for everything from QRP (IC- 703 Plus) to a typical 100 W Icom transceiver. All cables included. ***Suggested Price $169***

## Z-100

Designed from the ground up to provide 100 watt power handling in a small, lightweight package. Perfect for portable as well as sitting on your desk in your shack! The Z-100 will tune with 0.1 to 125 watts (50 watts on 6 meters), making it an excellent choice for almost any radio or operating style. Backpackers and QRP operators will appreciate the latching relays. Power can be removed from the tuner once you have tuned. Additionally, when it's not tuning, it draws nearly zero amps. ***Suggested Price $149***

Our customers have always known we're #1. LDG was the first company with a "no questions asked" two-year warranty on ALL our products, the first company to include all cables with our autotuners, and the first company with 3-D memory in our autotuners. LDG autotuners also have the highest resale value of any autotuner on the market today. So why wait? Get tuned to #1 at your favorite dealer!

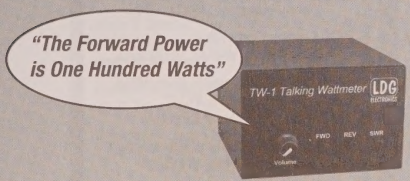
# The #1 Line of Autotuners!

### New FT Meter

LDG's new version of its popular FT-Meter presents a lush, highly readable 2.5" meter face with calibrated scales for signal strength and discriminator reading on receive, and power output, SWR, modulation, ALC action and supply voltage on transmit. Each function is selectable from the radio's menu. On/Off switch for the light.

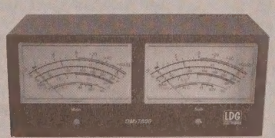
- LED back-illuminated in cool, high-visibility blue.
- Calibration adjustment is on the back of the unit; makes it easy calibrate.
- Backlight brightness adjustment is also on the back of the unit; so you can set the backlight to your desired level brightness.

The FT-Meter comes fully assembled and ready to go; just plug it into the radio and you're in the picture like never before. ***Still Only $49***



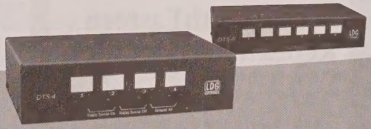
### The "Talking" HF Watt Meter

The TW-1 Talking Watt meter provides an spoken indication of power and SWR using a digitally recorded voice. It is ideal for the vision-impaired, for those of us in the "bi-focal set", or just for those times when you need to be looking somewhere else. At the press of a button, the TW-1 speaks the forward power, reverse power or SWR. Three languages are included: English, Spanish and German. It includes its own internal speaker; no external audio hookups are needed. Also available TW-2 UHF/VHF. ***Suggested Price $149***



### IC-7800 Owners... Your Eye-Strain Problems Solved!

Your beautiful IC-7800 deserves the best; add LDG's new DM-7800 dual meter system, and you're in the picture like never before. The DM-7800 is made exclusively for the IC-7800; order yours today. ***List Price $179***

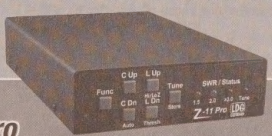


### The DTS Series Antenna Switches

Instantly switch your rig between 4 or 6 antennas with the press of a button. Auto-grounding when you shut your rigdown. Purchase the additional remote control and put the DTS Series switch anywhere indoors and operate it from your desk. They handle up to 1500 watts of RF power on HF (250W on 6M), and can be used with any coax-fed antenna. ***Suggested Price: DTS-4 $79, remote $39, DTS-6 $99, remote $49***

### RCA-14 Your Cable Problems Solved!

RCA-14 is a breakout box for the accessory jacks on most popular transceivers. It comes with cables with the right DIN plugs, and all the outputs are RCA jacks. You simply plug the RCA-14 into your radio's accessory jacks, and all your ports are right there at your fingertips; just plug and play, one function or all of them. The RCA-14 is compatible with: Icom 703, 706, 718, 746, 756, 7000 and 7800, Yaesu 817, 857, 897 and 840, Kenwood 480, 570, 2000, Ten Tec Orion and many more. ***Suggested Price $59***



### Z-11Pro

The original portable Z-11 was one of LDG's most popular tuners, accompanying adventurous hams to their backyards, or to the ends of the earth. Now meet the Z-11Pro, everything you always wanted in a small, portable tuner. Designed from the ground up for battery operation. Only 5" x 7.7" x 1.5", and weighing only 1.5 pounds, it handles 0.1 to 125 watts, making it ideal for both QRP and standard 100 watt transceivers from 160 - 6 meters.

"With 8,000 memories in LDG's exclusive "3-D Memory" array, the Z-11Pro uses LDG's state-of-the-art processor-controlled Switched-L tuning network. It will match dipoles, verticals, inverted-Vs or virtually any coax-fed antenna. With an optional LDG balun, it will also match longwires or antennas fed with ladder-line. All cables included. ***Suggested Price $179***

# Newly Adopted DVT Repeater Coordination Policy

This is a summary. The text of the policy is on the following pages.

*The following was written by an SERA board member. In keeping with his expressed wishes, The Editors will respect his desire to have this published without attribution. Questions, comments, or concerns addressed to the editor will be forwarded to the author for his consideration.*
*--- Tom Gallagher, N4IOZ*

The SouthEastern Repeater Association, Inc., in keeping with its goals to provide excellent services to the Amateur Radio community through coordination and insightful planning, has adopted provisions to allow for accommodations that will facilitate the amateur operation, in its districts, of digital voice technology repeaters (DVT repeaters) and systems including those such as APCO P25 and D-Star repeaters.

At the organization's Winter Board Meeting on January 5, 2008, in connection with a proposal submitted as a motion by Mississippi Director Steve Grantham – AA5SG, which was subsequently passed by the board, President Roger Gregory – W4RWG, appointed a working committee to implement changes as needed on the SERA web site and within the SERA FUP, SERA CP&G, and any other SERA documents or forms as needed, and also to assist district coordinators in matters pertaining to the coordination of such DVT repeaters.

Existing analog FM repeater owners will have the opportunity to convert to DVT repeaters. Repeater coordination assignments for DVT repeaters, such as those using APCO P25 or D-Star protocols, will be experimental and conditional. All coordinated DVT repeater assignments will be subject to change should implementation and attrition at some point in the future tip the scales from the current proportionally greater numbers of analog FM repeaters in favor of DVT repeater assignments and implementations. This allows for the potential future re-farming of frequencies for the creation of contiguous blocks of spectrum to segregate coordinated DVT repeaters from coordinated analog FM repeaters as may be deemed appropriate at some point in the future, and for changes that may otherwise be deemed necessary due to unmitigated interference.

In the 70-cm band, coordinated DVT repeaters will operate on the 12.5-kHz spaced channels, which are interleaved between the present analog FM repeater pairs that are spaced at 25-kHz and presently appear in the SERA FUP. An example of a typical analog FM repeater pair on the 70-cm band would be 444.6000-MHz with a +5.000-MHz offset. An APCO P25 DVT repeater may for example, as it has the capability to operate in either digital or analog mode on command, typically have a channel center frequency such as 444.6125-MHz, 444.6375-MHz, etc., and also use a +5.000-MHz offset. Though D-Star DVT repeaters do not presently have the same backward compatibility features as those designed into APCO P25 DVT repeaters, their assignments will be made on the same interleaved 12.5 kHz channels that are available for APCO P25 DVT repeaters in this band. Coordinating assignments in this way will have the effect of segregating the channel center frequencies by mode in order to avoid, help mitigate, or otherwise alleviate the ill effects of inter-mode incompatibility between existing coordinated analog FM repeaters and the new DVT repeaters.

In the two-meter band, APCO P25 DVT repeaters may operate on the existing 15-kHz spaced repeater channels between 146 and 148-MHz. With the much greater density of existing analog FM repeaters working in the two-meter band, the segregation of DVT repeaters by frequency is not as easily accomplished as is done in the 70-cm band. Therefore, as careful coordination and assignments are made, they must subsequently be enhanced through the mutual thoughtful and responsible cooperation of all repeater trustees and users.

Also in the two-meter band, D-Star DVT repeaters will operate on the 600-kHz offset channels in the 145-MHz repeater sub band, on existing 20-kHz spaced repeater pairs, on newly approved 10-kHz D-Star DVT repeater only channels that are interleaved with the existing 20-kHz FM channels, and on eight new supplementary repeater output frequencies with their associated new input frequencies as listed in the following paragraph. While some D-Star DVT repeater channel center frequencies may be on the 20-kHz spaced dual use channels in this sub band, it is preferred that D-Star DVT repeater frequency assignments be made on the new interleaved 10-kHz D-Star DVT repeater only pairs where possible in order to avoid, help mitigate, or otherwise alleviate the ill effects of inter-mode incompatibility between existing coordinated analog FM repeaters and coordinated DVT repeaters. A coordinated D-Star DVT repeater might, for example, therefore be assigned on 145.200 with a -600-kHz offset.

As there is no particular expectation that DVT repeaters will overtake analog FM repeaters in the numbers of working installations, everyone needs to be mindful of the requirements and provisions of the FCC rules in Part 97. All stations must use the minimum power necessary to establish and maintain communications. Repeater trustees have the authority and the responsibility to limit the use of their repeaters as needed to avoid, reduce, eliminate, or otherwise mitigate interference to repeaters. All DVT repeater coordination assignments being "experimental" in nature, their trustees are expected to avoid and promptly mitigate interference. However, the use of commonly available tools for mitigating potential interference to analog FM repeaters is encouraged by all repeater trustees. Those tools, of course, are tone-coded or digital-coded-squelch systems, which are also known as CTCSS or DCS.

While the proponents of DVT repeaters in the larger metropolitan areas are encouraged to seek out existing analog FM repeaters for conversion, in order to accommodate the need for new spectrum for D-Star DVT repeaters on two-meters, the following D-Star DVT repeater frequencies have been allocated. These output frequencies are 144.920, 144.940, 144.960, 144.980, 145.020, 145.040, 145.060, and 145.080 MHz. Input frequencies may be assigned from the following; 146.420, 146.440, 146.460, 146.480, 147.420, 147.440, 147.460, and 147.480-MHz. It should be noted, however, that the inputs of these new pairs generally occupy the same space, with overlapping bandwidths, as the alternate offset analog FM repeater inputs. For instance, if an existing coordinated analog FM repeater in a particular area uses 147.465 as a coordinated input, then a 147.460/144.960 D-Star DVT repeater pair would not be available for assignment there. Also, D-Star simplex operations might use these eight new D-Star DVT repeater inputs where practical and workable and to avoid interference to existing analog FM repeater inputs. Hopefully, this practice will help keep the more popular analog FM simplex frequencies, such as 146.520, 146.550, 146.580, and others, clear of D-Star traffic.

D-Star DVT repeater effective radiated power, and that of other DVT repeaters, will be limited to something consistent with talk back range for unmodified stock mobile units as D-Star reportedly has digital signaling deficiencies and liabilities that scream for additional co-channel geographical spacing between D-Star DVT repeaters in excess of what is normally accepted for analog FM repeaters. Experimentation through the use of add-on amplifiers, by users and repeaters alike, exacerbates this problem. Such excess ERP also aggravates digital interference to FM users and repeaters.

In addition to serving in implementation and advisory capacities, the committee will continue to study and bring forth new information as needed to facilitate ongoing effective DVT repeater coordination efforts in these and other bands. Applicants should be aware that due to the level of comprehensive study presently required for coordinated DVT repeater coordination assignments, these will take a bit longer to process than applications for analog FM repeaters and their patience will be appreciated.

The Digital Voice Technology Repeater Coordination Study, Implementation, and Advisory Committee, led by Mississippi Director Steve Grantham, AA5SG, includes other members:

Secretary and West Virginia Director Alex Hedrick, N8FWL
South Carolina Vice-Director Jim Cantrell, WJ4C
North Carolina Director Danny Hampton, K4ITL
North Carolina Vice-Director Frank Lynch, W4FAL.

# The Motion Passed
by the
# SERA Board of Directors
January 5, 2008

The SERA President will appoint a working committee to implement the following as needed on the SERA web site and within the SERA FUP, SERA CP&G, and any other SERA forms as needed and to assist district coordinators in matters pertaining to the coordination of D-Star Repeaters and other digital voice technology repeaters such as APCO P-25.

1) All D-Star Repeater and other digital voice technology repeater coordination assignments (including that for APCO P-25 or similar) will be "experimental" and will be subject to change when attrition tips the scales in favor of D-Star Repeater (and/or other digital voice technology repeater) assignments and implementations allowing for the re-farming of contiguous blocks of spectrum to segregate D-Star Repeaters (and/or other digital voice technology repeaters) from FM and/or other mode repeaters as may be deemed appropriate in the future and when deemed necessary due to unmitigated interference.
2) Allow existing coordinated FM repeaters to convert to D-Star Repeater technology (or other digital voice repeater technology as APCO P-25) on "experimental" and non-interference basis.
3) Allow for new coordinated "experimental" D-Star Repeater implementation on existing 20-kHz spaced FM repeater channels on two-meters on a non-interference basis.
4) Encourage D-Star Repeater applicants to seek out existing coordinated FM repeaters for conversion to D-Star technology as described in numbered line two and three above.
5) Allow for new coordinated "experimental" APCO P-25 Repeater implementation on existing 15-kHz spaced FM repeater channels on two-meters on a non-interference basis.
6) Encourage APCO P-25 Repeater applicants to seek out existing coordinated FM repeaters for conversion to APCO P-25 technology as described in numbered line two and five above.
7) Allow for coordinated "experimental" D-Star Repeater implementation on 10-kHz channels interleaved with the existing 20-kHz FM channels on two-meters on a non-interference basis.
8) Allow for coordinated "experimental" D-Star Repeater (and/or other digital voice repeater technology as APCO P-25) implementation on 12.5-kHz channels interleaved with the existing 25-kHz FM repeater channels on 70-centimeters on a non-interference basis.

9) Limit D-Star Repeater ERP (and that of other digital voice repeater technology as APCO P-25) to something consistent with talk back range for unmodified stock mobile units. (D-Star has digital signaling deficiencies and liabilities that scream for additional co-channel geographical spacing between D-Star Repeaters in excess of what is normally accepted for FM repeaters. Experimentation through the use of add-on amplifiers, by users and repeaters alike, exaacerbates this problem. Excess ERP also aggravates digital interference to FM users and repeaters.)
10) Limit new APCO P-25 Repeater coordination to the 600-kHz offset channels in the 146 and 147-MHz repeater sub bands. (This and all numbered lines will be consistent with the "experimental" and subject to change clause at numbered line one.)
11) Limit new D-Star Repeater coordination to the 600-kHz offset channels in the 145-MHz repeater sub band and to the eight new repeater pairs with the new offsets listed below. (This and all numbered lines will be consistent with the "experimental" and subject to change clause at numbered line one.)

## New D-Star Repeater Pairs

| Input | Output | Offset |
|---|---|---|
| 147.420 | 144.920 | 2.500 |
| 147.440 | 144.940 | 2.500 |
| 147.460 | 144.960 | 2.500 |
| 147.480 | 144.980 | 2.500 |

And

| Input | Output | Offset |
|---|---|---|
| 146.420 | 145.020 | 1.400 |
| 146.440 | 145.040 | 1.400 |
| 146.460 | 145.060 | 1.400 |
| 146.480 | 145.080 | 1.400 |

(D-Star simplex operations may work on these new D-Star Repeater inputs where practical and workable to avoid interference to existing FM repeater inputs.)

The motion is published here, as proposed, for the information of repeater operators and users. If you have questions, comments, or concerns about Digital Voice Technology (DVT) issues, please address them first to your state director, whose contact information is listed elsewhere in this issue of *The SERA Repeater Journal.*

It should be remembered that this proposal was offered in the interest of helping D-STAR and other DVT operators to establish systems while minimizing interference between both current band users and users of the new technologies. It should also be noted that the term "experimental" refers to the coordination assignments and <u>not</u> to the D-STAR and APCO P-25 technologies.

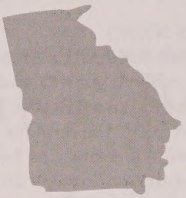
# Georgia



John Talipsky, N3ACK

Hello Georgia! News was a little slow coming in from around the state this quarter. Work has already begun on the May edition of this column! If you know of an aspect of the hobby that is not regularly reported on please email me and I will work to include the information in future columns. I hope everyone had a successful 2007 and good luck to you and your club in 2008! If you edit a club newsletter or relay news items for clubs or groups please send me your mailings during the year so that I may also include it here.

**CLUB NEWS**

The Atlanta Radio Club is holding a monthly "tech session" on the second Sunday of each month at 3 p.m. in the main administration building at Peachtree Dekalb Airport. The intent is to help amateur radio operators "learn or hone" a variety of technical skills, with training extending from beginner to intermediate skill levels, and presented in an interactive format. The December 9 session covered info on repeaters, DCS, tones, IRLP, and a general how-to, as well as additional information on how to find repeaters while on the road, net resources, and ARRL resources. Talk-in is on the club's 146.82 repeater.

The Barrow ARES Club has only been in existence since March, and after nine months of working together, they've recently given birth to their very first slate of officers. Congratulations to President- Cal Neff, K4JSR; VP- Davis Wallace, K1DGW; Secretary- Bill Wilson, KJ4EX; and Treasurer- Steve Lynn, K1SRL. All hams in the area are cordially invited to join us and pig out on the Breakfast Buffet! Activities planned for 2008 are: Ham classes for beginners and upgrades, Emcomm Training, and Winter Field Day.

Georgia is proud to have another new amateur radio club, The Charles E. Kilbourne ARS. This club was organized by members of the Georgia State Defense Force, and includes members of the GA National Guard and Air National Guard, as well. Check out N4SDF on QRZ for some interesting reading about him and this club. This society is named in honor of Major General Charles E. Kilbourne who is the only recipient of the Medal of Honor to have received this distinction while performing a signal related combat mission. While under heavy hostile fire and exposed to this fire, LT Kilbourne climbed a telegraph pole and repaired the line, reestablishing communications to the front lines. The society is operated by members of the Georgia State Defense Force, 911th Support Command, Signal Battalion in service to the people of the State of Georgia. Membership is open to any member of the Georgia State Defense Force, The Georgia Army National Guard, The Georgia Air National Guard or any one who wishes to further promote the popularity, goodwill, recognition and respect of our hobby both within our fraternalism and the Community in a manner which will serve to the best interest of Amateur Radio.

It is with great sadness that The Gwinnett ARS announces that Howard P. Gould "Howie," W9HG, is now a Silent Key. He died after a long battle with congestive heart failure. A Mass was held at St. Stephen the Martyr Catholic Church, 5373 Wydella Road, Lilburn, GA at 10:30 am on Monday January 7, 2008. Howie was a life member of Gwinnett Amateur Radio Society. Howie helped many of us get our licenses, and was always in the heat of all of the discussions about amateur radio. He might argue with you all day long about something, but he was still your friend afterwards. Howie will be missed, by all of us in the Atlanta amateur radio community

The North Fulton ARL continues to come up with ways to stir up new excitement. First, their "Techs on Ten" net to help new hams get their feet wet on 10 meters, then the Friday night CW practice net on their 145.47 repeater, and now, it's hosting club build-a-thons. Recently, they got together on a Saturday to build their first project, a crystal oscillator. From the pictures I've seen from the event, one really stood out. It showed a young lady, no more than six or seven years old, grinning from ear to ear, clearly demonstrating that "all she wants for Christmas is her two front teeth", while holding up her completed project. It's a

priceless picture, showing that this first building project wasn't just for us old fogies. It was such a rousing success; in fact, plans are underway to hold another club build-a-thon after the first of the year.

The Northwest Georgia ARC held their annual elections, and congratulations go to the following: President- Ed Wilson, W4EMW; VP- Paul Quillen, N4LCD; Treasurer- Virginia Brock, KF4NYH;and Secretary- Ellen Dickert, KD4NTF.

The Southeastern VHF Society Conference is calling for the submission of papers and presentations for the upcoming 12th Annual Southeastern VHF Society Conference to be held in Orlando, Florida on April 25 & 26, 2008. Papers and presentations are solicited on both the technical and operational aspects of VHF, UHF and Microwave weak signal amateur radio.

**ARES NEWS**

Statewide ARES Meeting 2008 - Mark your calendar! Thanks to Lowry Rouse, KM4Z, GEMA DEC, the date for the statewide meeting has been set for Saturday, January 26. It will be held, once again, at the Public Service Training facility in Forsyth, and Lowry has reserved the Auditorium from 11a.m. until 4:30 p.m. for our general meeting, a classroom from 9 a.m. until noon for our December meeting, and another classroom from 10 a.m. until noon for EMCOMM testing.

## It's All Free!

Did you know that SERA assistance in coordination, technical help, or interference information is FREE. We do not charge for any of our services. Our operating expenses are derived solely from voluntary membership of Repeater Owners and users.

In 2008, SERA enters it's 37th year of successful operation and service in the South-Eastern 8-states.

Our volunteers are here for you. If you have any questions about SERA, don't hesitate to call or ask. It's that Simple!

EIGHTEENTH ANNUAL

# DOWN EAST HAMFEST

## Sunday – April 6, 2008

8 AM until 3 PM

At the

Lenoir Community College Gymnasium

Hwy 70 East & 58 South

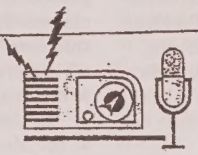
Prizes

Bigger & Better

Heated Indoor & Flea Market
Tailgate Facility Outside

Tailgaters: Maximum 2 tables

**Talk in on**
**146.085 / 146.685**
**88.5 Tone**



**Kinston**

**HAMFEST info**
**(252)-523-2703**

WIN!

First Prize:
HF Transceiver !

Also:
**Hourly Prizes**
(Must be present to win)

Items to sold at the Hamfest: radios, computers & relating Amateur Radio assessories.

## FCC EXAMS

Bring an original and a copy of your license or certificate and Credit Certificate (if applicable). Walk-ins only !

*Exams start at 11 AM*

**ADMISSION**

**$4 each or 3 for $10 in Advance**
**(pre-register by March 30, 2008)**
**$5 each or 3 for $12 at the Door.**
**Tables available thru pre-registrartion on a first come first served basic.**
**Locations are assigned by HAMFEST.**

# Tennessee

Bob Gault, KD4NEC

Howard Waldron, the East Tennessee guru of shaping amateur radio operators into credible weather spotters, has announced plans to retire from the National Weather Service. Serving N-W-S in several capacities during his career, Waldron, who is currently the Warning Coordination Meteorologist in the Morristown forecast office, formalized retirement plans for 2008.

In fact, news of his departure from the weather service spread quickly across the region and he was left to explain that he would be around another year as he conducted spotter training in 2007. Time has passed and he is giving his last classes on weather spotting as this issue of the Journal comes off the press and is distributed to our readers.

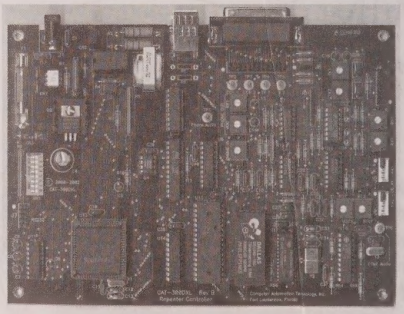
In the time he has served at the Morristown office many of those who attended presentations consistently year-after-year came to know him on a first-name basis. He helped thousands of people to acquire an understanding of severe storms and the impact east Tennessee's hilly and mountainous terrain can have on these approaching systems.

Waldron's presentations provided understanding of the basics of meteorology and how that relates to tornado development. Flooding and lightning are other dangers that he included. Each person who attended came away with proper reporting methods for severe weather. It included estimating the size of hail using standard objects – not marbles.

Waldron's knowledge of weather and his enthusiasm for sharing it with others helped develop a network of field reporters who became the "eyes of

CAT-300DXL Repeater Controller

The CAT-300DXL has all the features of the very popular CAT-300DX including a full feature autopatch and a Remote Base Port.



Features Include:

Voice Synthesizer ID
(20) Voice Messages
Real Time Clock
(20) Position Scheduler
Full Feature Autopatch
(100) User Speed Dials
Emergency Speed Dials
Reverse Autopatch
Remote Base Port
CW Identifier
(20) User Macros
DTMF Audio Muting
DTMF Pad Test
(4) Logic Inputs
(4) Output Switches
Optional Windows® Editor

Ordering Information

**CAT-300DXL** Controller Board, Wired & Tested **$399.00**
**RME-1000** Rack Mount Enclosure **$99.00**
**ED-1000** Windows Editor **$69.00**

**Computer Automation Technology Inc.**

Internet: http://www.catauto.com

the weather service" to provide accurate reports of threatening weather.

The next Warning Coordination Meteorologist will have some big shoes to fill but will be received by hundreds of eager amateur radio operators wanting to learn more about weather spotting and meteorology.

Looking through several club newsletters it appears most clubs held special activities for the Christmas holidays. Good food and fellowship gets members involved every time!

The Cleveland Amateur Radio Club (CARC) recognized retiring vice president Buddy Miller, KD4SCS, at their Christmas dinner. Miller served over 11 years in that capacity through four club administrations. He often filled in the president's absence and was responsible for club property and maintenance of the building and grounds. CARC was the beneficiary of a $5,000 state grant. State Rep. Eric Watson helped secure funds the club earmarked for building improvements and equipment additions. The Tennessee legislature allocated $22 million in surplus funds to government entities and non profit organizations that have an IRS 501 (c) (3) exemption. CARC President Glen Clayton, W4BDB, was elected Section Manager for Tennessee ARRL. He took office January 1.

The Oak Ridge club reports a successful 2007 hamfest. This is one of the Tennessee 'fests that retains the atmosphere of good times and fellowship. But hamfests are becoming more expensive to plan. Support the 2008 hamfests you'll find listed in the Journal.

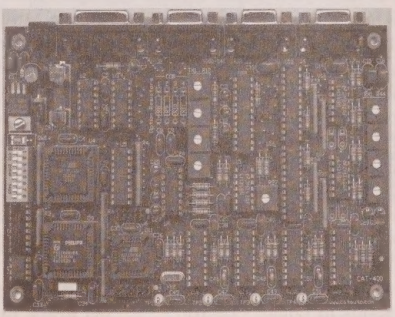
Speaking of hamfests, the Chattanooga Amateur Radio Club was back downtown at the Trade Center after several years in East Ridge. I haven't heard how things went or any plans for 2008, but it's always one of the last 'fests of the year.

I was saddened by news of the passing of O.D. Keaton, WA-4GLS, in early December. The Bristol ARC provided some biographical information in their newsletter. Funeral services were held on December 9 in Mt. Juliet. Keaton served as Section Manager (SM) and Affiliated Club Coordinator for Tennessee for many years. He first became the Section Communications Manager in 1971 and continued in that position through 1979. He served a second stint as SM from 1992 through 2001. He will be missed by the amateur community.

Till next time, 73...

# CAT-400 Repeater Controller

*This controller combines the features of the popular CAT-250 controller and the RLS-1000 Remote Link Switch into a four- port controller ideally suited for sophisticated linking systems.*



## Features Include:

# Kentucky

Pat Spencer, KD4PWL

Welcome to a new year, and I wish you a safe, prosperous, and enjoyable 2008.

Looking around the Commonwealth, South Central Kentucky is experiencing growing amateur activity according to Ben Runner, Jr., W4WSM. Runner reports the "KY District 4 ARES Net has seen its check-ins increase dramatically in the last year. More net control operators have been added and they are doing a great job." One of two nightly VHF/UHF nets in Kentucky, Runner invites all amateurs to check in at 9 p.m. CT on the 147.165+ W4WSM repeater. He says that the repeater "is located in Bowling Green and covers the district 4 area well. Upgrades are in the works for the machine to make it cover the region even better."

Filling us in further about the region, Runner reports "Russellville now has its own 2 meter repeater. The 146.655 has been moved a few miles from south of Bowling Green to a new location in Russellville. The many new hams in Logan County now have mobile and portable coverage in the downtown area. A local net has been formed on the repeater and emergency communication plans are in the works with the local amateurs. The 146.655 was originally coordinated in the mid 1980's by CVRA even before the west side of the state was a part of SERA."

The other nightly VHF net in Kentucky is the River Cities Amateur Radio Association Net at 7:30 ET on the 146.940- KG-4DVE repeater.

The Radio Technology Class class at Dixie Heights High School reported in the November 2007 issue was a success in bringing forth the next generation of amateur radio operators. According to AP Chemistry and Honors Physics teacher Jim Hicks, WB4CTX, the following students received their licences:
Cory Clark, KJ4AOC
Rosalie Dallary, KJ4AOJ
Ian Gibson, KJ4AOF
Sam King, KJ4AOE
Luke Mace, KJ4AOH
Colton Miller, KF4AOI
Christopher Overpeck, KJ4APY
Jennifer Packwood, KJ4AOA
Thomas Roberts, KJ4AOB
Jeremy Sebastian, KJ4AOD
Matthew Steffen, KJ4AOG
Clay Volpenhein, KJ4ANZ

The Kentucky District 7 Amateur Radio Emergency Team (KD7ARET) awarded Ian Gibson, KJ4AOF, a 2M handheld for having the highest grade in the class. Sebastian was rewarded for having the second highest grade with a 70cm handheld by another donor. The Northern Kentucky Amateur Radio Club has donated a year's membership to all those receiving their licenses.

Putting their new skills to use, the students and faculty have created the Dixie Heights High School Amateur Radio Club, which was granted the callsign of KY4DH by the FCC. "We have an Icom 746pro, with a Gap Titan DX antenna on the building, and a Yaesu UHF/VHF mobile with a Diamond Tri Band antenna," Hick commented.

He went on to say, "Anyone who would like to donate to Dixie Heights High School to keep this effort going can send a check to Ms. Kim Banta, Principal Dixie Heights High School, 3010 Dixie Highway, Edgewood, KY 41017. She has been so supportive of this program in its creation and progress to this point. Letters of support for this program would also be appreciated."

Staying in Northern Kentucky, John Meyers, NB4K, announced that he will step down at the end of 2007 as ARES District Emergency Coordinator and as Chairman of KD7ARET. As leader of that organization over the past 27 years, Meyers also served as ARRL Kentucky Section Manager for three terms. Meyers commented, "I am a very lucky person who have been able to be the leader of such a wonderful group of hard working amateurs, you don't have to take a back seat to no one in the ARES program as you all are striving to be the top of the ladder."

Succeeding Meyers in both roles is Brian Clark, W4SOU. Clark, who shared the 2007 Kentucky ARES Operator of the Year award, is very active in the district. Commenting in his nomination for that award, Meyers praised Clark's "indefatigable efforts for the ARES program and his community make Brian a shining example for new ARES members." More recently, Meyers commented on Clark, "I ask each of you to support Brian Clark, W4SOU, who will replace me. He is very capable and has

trained very hard to accept his new role.

Meyers will remain a member of the organization, and will be working hard to further amateur radio efforts in Pendleton County.

Ending this issue's column, I will bid you a fond farewell as the Repeater Journal Kentucky Columnist. After 3 years, I will be following new pursuits. I will continue to administer the Kentucky Amateur Radio Web site, and the KYHAM Listserv and serving in my role in Kentucky Section ARRL and KY ARES.

If you are interested in writing this column, please contact Repeater Journal Editors at editor@sera.org.

# North Carolina

Michael J. Lewis, WA4KE

The year has commenced and a new season of hamfests is upon us. Make sure you try to visit your favorite hamfests this year and support your favorite club as much as possible in 2008.

Since I serve double duty as the SERA NC Correspondent and the ARRL NC Affiliated Club Coordinator, I want to use a small portion of the column to address the importance of maintaining your club's ARRL Affiliated Club status. The ARRL website has a page dedicated to ARRL Affiliated Clubs and the club's specialties. In order for new hams to locate clubs and to become active in the hobby, the contact information contained within the ARRL website needs to updated and maintained on a regular basis. Clubs that have not updated their club listing in over two years will be listed as inactive. Once your club is affiliated, it remains affiliated. To stay actively affiliated, you must complete and submit an Annual Report at least once a year. Your club's status will be changed to inactive should 2 years go by without our receiving an Annual Report. Your club can return to active status at any time by simply completing and submitting an Annual Report. ARRL HQ offers every club an opportunity to update their information before we list a club as inactive. The purpose of this update is to be able to provide new or prospective hams with current contact information for a local club. Also, if the club has a website, please contact Susan, WA4AKB, to update the NC ARRL website. Susan's email address is wa4akb@arrl.net.

On December 21, 2007, the Kinston Amateur Radio Society will celebrate its 59th year of being affiliated with the ARRL, making it the second oldest ARRL affiliated club in the State of North Carolina.

The newest ARRL affiliated clubs in North Carolina include United States Power Squadrons ARC - Raleigh, NC, Brunswick Shores Amateur Radio Club - Oak Island, NC, and Bladen Amateur Radio Society - Elizabethtown, NC.

On December 1st, the Azalea Coast ARC participated in "Battleship Alive Day" at the request of the USS North Carolina (BB-55) Memorial. This was a Morse Code only event. The club operated from Radio Central (Radio 1) remotely keying one of the Ship's original transmitters located in the transmitter room--Radio 2. The transmitter, a Westinghouse TBM-4 was placed in service aboard the Ship on July 15, 1941. After a long slumber of 5-plus decades following the Ship's decommissioning in 1946, the transmitter was brought back up on the air--this time on the amateur radio bands--on January 29, 2002, after some repair by the Azalea Coast Amateur Radio Club. On Thursday evening, December 6th, the ACARC put the Ship on the air for the 67th observance of Pearl Harbor Remembrance Day. (AG4PA)

Ham radio played its part in the new incarnation of the Raleigh Marathon, this time called the "City of Oaks Marathon." Organized by Bill Cole, KG4CXY, and the Carolina Helping Hams. Ten hams manned positions at the water "stops" ever other mile (the runners don't stop), covered a four-mile stretch in Umstead Park where SAG vehicles couldn't go, and shadowed the race director. Dick Orander, KD4ISC, served as Net Control. (KN4AQ)

**EMERGENCY & DISASTER LEADERSHIP SUMMIT AT WCU**

On November 15 a small group of section ARES leaders attended the Emergency and Disaster Leadership Summit at Western Carolina University. The ARES exhibit at the summit drew moderate interest and there was a good slate of speakers. Although focused on emergency management officials and first responders, many points are applicable to ARES. More detailed comments on www.ncarrl.org.

**Hillsborough NC**

Eighteen Amateur Radio operators checking into the Saturday morning Orange County ARES Net on November 3rd also participated in the 2007 North Carolina Simulated Emergency Test, or "SET," which tests the ability of the ham radio community to respond to emergency situations. Stanley ("Skip") Fisher, N6LUZ, Amateur Radio Emergency Service (ARES) Emergency Coordinator for Orange County, provided liaison communications via shortwave

radio with North Carolina's Statewide Emergency Operations Center, located in Raleigh. (From the Orange County Amateur Radio Emergency Service, Raymond L. "Woody" Woodward, K3VSA.)

The ACARC in Wilmington organized a work party at the TV-3 tower site for ground cleanup as part of a quid pro quo arrangement--prime amateur antenna locations at an excellent altitude on the tower at no charge. Contribution of a couple of hours of time on Saturday morning is an ideal way to insure that the tower owners/managers maintain a favorable impression of the amateur radio community. An ARC in Greensboro has this same type of arrangement with a local TV station there.

As part of the Kinston Amateur Radio Society meeting, Dave, W4DNA, explained the basics of the CoCoRaHS (Community Collaborative Rain, Hail, and Snow Network) data collection program. This is a unique, non-profit, community-based network of volunteers of all ages and backgrounds working together to measure and map precipitation (rain, hail, and snow). North Carolina began its official participation on September 1 recording precipitation amounts. Dave, W4DNA, is County Coordinator for Wayne County and Charles, NC4LA, is County Coordinator for Lenoir County. Information on becoming a CoCoRaHS volunteer can be obtained through them or from the CoCoRaHS website at www.cocorahs.org.

Raleigh ARS Chairperson, Hank Montgomery K4HM, has noted that the RARSfest 2008 will take place on Saturday, April 12 at the NC State Fairgrounds. This date is different from what had been previously announced and advertised. Please spread the word about the change. Also, contact Hank if you would like to volunteer to help with the hamfest.

The PCTN (Piedmont Coastal Traffic Net) meets every night at 9 pm on the 146.88. The purpose of the net is to handle/pass NTS formal messages. Amateur stations are encouraged to check-in and participate. The backup repeater is the 147.105 machine with a PL tone of 82.5.

In closing I would like to thank the editors of the newsletters that provide the club news which I quote each quarter. Please continue to send the emails and newsletters for your club. As space permits, we try to publicize the clubs' events as much as possible.

Thanks – WA4KE@sera.org

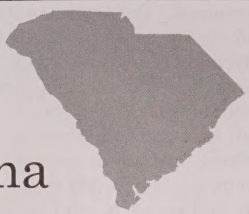
# South Carolina



Roger Gregory, W4RWG

**Hello South Carolina,**

I received a Christmas card from John, ND4N and Sue, N4ENX, Chism. Sue informed me that she and John had bought a farm, left Greenville and moved to Indiana. Both John and Sue have been very active with the **WCARS Volunteer Examiner program** in upstate South Carolina. John was the WCARS administrator in South Carolina. For years they have been good friends to the amateur community and to me. Giving of their time to prepare and administer amateur radio tests. They will surely be missed, but I wish them well as farmers. I sure hope they stay in touch by email or maybe on the airways.

Jim, WJ4C, and I attended the SERA Board Meeting in Pigeon Forge, Tennessee on January 5 and 6. I ran unopposed and will serve a third 2-year term as President of SERA for 2008-2009. I appreciate the confidence that the SERA full members and the SERA Board of Directors have in me. I will continue to do the very best job I can as both President and South Carolina Director. In other business, the SERA Board approved 8 conditional repeater pairs that can be used for D-Star repeaters. Although we have no D-Star or digital repeaters in SC, a couple of the other States have a few popping up, and SERA needed to have a place to put them away from analog repeaters. Look for more on D-Star in elsewhere this issue.

The **Florence Amateur Radio Club** has created a scholarship program, which will be granted to a deserving Electronics Engineering Technology student starting with the Spring Semester 2008. This scholarship will be to attend Florence-Darlington Technical College. The FARC recognizes Tim Webber, WD4CHS and Oliver Webber, WD4CHR as the family of the month. Both grew up in Spartanburg. Both received their call signs in February 1977. Oliver is primarily interested in HF, contesting, and DX. He is a retired Industrial Engineer. He is also a 20 WPM Extra. Tim is interested in VHF and UHF. He competes in VHF contests and still runs a packet station 24/7. Congratulations to both of you.

The **Foothills Amateur Radio Club** has 2 repeaters: 2 meters (146.700-mhz PL tone 107.2) and 440mhz (442.125). The FARC is located in Pickens, SC and their website is located at www.wt4f.org.

The **Greenwood Amateur Radio Society** held their annual Christmas dinner meeting at Ryan's on 72 Bypass in Greenwood. Paul Savage, KA4OPC, is a resident at Magnolia Manor Nursing Home. We wish Paul a speedy recovery. The Greenwood hamfest was held on Saturday, January 12. I appreciate the courtesy extended to SERA and me. It was a great hamfest.

The **Pickens County Emergency Communications Group** participated in a VHF / UHF contest the 2nd weekend in May. The group also participated in Field Day activities on June 22 at the Pickens County E.O.C. The Mobile Command Center has many different modes of communications installed including Commercial UHF, VHF, and on the amateur bands 2 meter, 440, 220, 10 meter, 6 meter, and 10-160 meters. The group also has a new call sign, WX4PG. On October 13, 2007 the group helped with the Pumpkin Town Festival in Pumpkin Town, SC. On December 4, 2007 a program on ATV was presented by Terry Lambert, KB4PQA, and Ron Alberson, WA4MWC.

The **Salkehatchie Amateur Radio Society** has elected new officers for 2008. They are President Almarine D. Gorham, KI4KEM; Vice President Ralph Willis, KI4IKA; Secretary / Treasurer Ray Thomas, WA4OMM. The SARS has plans to procure a travel trailer to be used for emergency communications. The SARS welcomes new member Milton Sanders, KI4IJZ, and family. The SARS has a new repeater. The frequency output is 444.250. I just finished their coordination in time for this issue.

The **Spartanburg Amateur Radio Club** congratulates Mary McAbee, KI4WUW, for passing her Technician Test and receiving her license. New officers for 2008 are President Art Patterson, KE4EAN; Vice President Robert Cockman, WD6ELK; Treasurer Ann Thompson, KI4MEE; and Secretary Bret Phillips, N9LPT. The

following appointments were also made: Program Chairman Randy Clair, KI4CQO, and Net Manager Steve Wilzbacher, K4SAW. The Telephone Pioneers have donated the West Springs 224.440 repeater located in Union County to the SARC. Hello my friend Fritz. Hope you are well.

The **Union County Amateur Radio Club** announces that the Union WCARS VE Team holds exam sessions the 2nd Thursday in January, March, May, July, September, and November at 7:00 p.m. in the Union County 911 Center training room on North Pinckney Street in Union, S.C. Contact Jim WJ4C for information, wj4c@charter.net.

Attention South Carolina Repeater Owners: Are you a SERA Full Member? I would like for you to consider joining the SouthEastern Repeater Association. The cost is only $20.00 per year. Send your full membership dues in today. Let's make South Carolina 100%. SERA needs your support and with full membership not only will you support the SouthEastern Repeater Association, you and your designee will receive the Repeater Journal for as long as you are a full member. What a deal!

Would you like to see news from your club in the journal? It's easy! Tell your club Secretary to make sure I am on their newsletter mailing list.

73,

Roger W. Gregory, W4RWG
SERA President
SC Director

Fred Weaver, KG4BKI

Happy New Year to all! As my Editor noted last time, I have crossed the 5 year mark as your Correspondent. So, in a few years, as I start pushing a little closer to 70 YO, I will be trolling around for my replacement. Apologies to my readers for missing a column a couple of issues back. Things just seemed to get a little bit "lost in the ether" relative to my submission. *(editor's note: our columnists work on a no-hassle, but very tight, production schedule. Needless to say, Fred sent the submission on time, but it wasn't relayed in time to get his writing into the issue.)*

**BEWARE OF EAVESDROPPERS**

Last Summer I discussed, over a local repeater, my plans for a trip to Florida with my family. When we returned, our home had been burglarized. VCR, tape deck, coins, silverware, etc. were gone, and of course my Ham radio equipment was missing. I did have my SSN and call sign on most of the rigs. Two weeks later, the police recovered a stolen car in the next state. The trunk was filled with stolen property. On the front seat was a scanner programmed full of local repeaters and a 1992 Call Book with over 100 calls checked in a three state area. Beware of the EAVESDROPPERS; do not give out personal information over the air waves. *"Too Embarrassed To Sign" (From the Hamtown Wave, Vol. 2, No. 11.)*

**SPECIAL EVENTS**

There were several notable special events in December.

On Dec. 1 & 2 the Chesapeake Amateur Radio Service held a special event commemorating the Revolutionary War Battle of Great Bridge. The club's event was held at their clubhouse, which is within sight of the modern Great Bridge.

The USS Wisconsin ARC held a "Remembering Pearl Harbor" Special Event on Dec. 7 & 8.

Tidewater Wireless W4VB News has been showing up in my snail box more regularly of late. Tidewater Wireless operates three 2M repeaters, two 440 repeaters (one with Echolink) in the Norfolk, VA area; and a 220 machine is in the works. Most of the repeaters have autopatch and a variety of linking options.

Radio Amateur Society of Norfolk (RASON) has nets on Monday-Wednesday at 7:30 p.m. and Norfolk ARES has a net on Thursday at 7:30 p.m.

The latest newsletter, news, operating instructions and frequencies are at www.w4vb.org.

**A Tale of Two Repeaters.**

It seemed like the worst of times for Ham Radio clubs when I became a ham in late 1998. Two local clubs were struggling to keep things going. For my tale, let's call them Club 'S' and Club 'More S'. I can say more about Club 'S' because the club survived and thrived; Club 'More S' did not. Around 1999, Club 'S' had the rather disturbing experience of just two members showing up at the meeting where the agenda included the nomination and election of officers for the next year. Ooops! The president of the club proposed to disband the club if there was no interest in it.

Well, that had members popping out of the woodwork. Email began to fly! "No! We can't let this happen." they cried. And, it didn't. The constitution was re-written to allow for fewer meetings; and a core of dedicated members kept things going. The club met for a period of time in the president's living room. Gradually, new officers emerged who developed more activities. The repeater played a key role as a source of announcements. A weekly club net was maintained even when there were only a few stations checking in.

Club 'S' picked up steam adding new members, supporting a wider variety of activities; such as, training classes and a VE team. Increased activity on the repeater reflected this growth. Club members who are truck drivers use the repeater daily and monitoring their communications as they move about the area gives the club ground level reports on weather and road conditions in the area. Morning and evening drive time activity has become much more active too.

As indicated in the lead, Club 'More S' did not survive very far into the 21st century. For a period of time there was activity on their repeater. The club had a net that I sometimes checked in to. Even with a number of active members, a failure to achieve harmony and good will caused the club to go out of business.

The repeater? Basically, it was used very little and when it was put into hibernation (turned off) for a long time, few made note of it.

And your point, Fred? It takes a club to put activity on a repeater. When a club is active and has members who are happy to bump into one another on the air; that's a repeater where hams will congregate. The members will refer to it as 'our' repeater. When folks are not so happy, they will just sing in another choir.

bki> 73

# THE SERA OFFICIAL REPEATER INDEX

**REPEATER LISTINGS FOR: GEORGIA ■ KENTUCKY ■ MISSISSIPPI ■ NORTH CAROLINA ■ SOUTH CAROLINA ■ TENNESSEE ■ VIRGINIA ■ WEST VIRGINIA**

IMPORTANT NOTICE: The SERA ***Repeater Journal*** is Copyright 2008 by the SouthEastern Repeater Association, Inc., the officially recognized Amateur Radio Repeater Coordinating organization for Kentucky, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia.

The SERA ***Repeater Index*** may NOT be published or reproduced, in any form, by any individual, publication, electronic source, or any other means, for distribution without the expressed written consent of the SERA, Inc. All other rights reserved.

SERA will not be responsible for incorrect or omitted listings. The responsibility of correct listings is that of the actual repeater owner or sponsor. SERA makes every effort to keep the index as accurate as possible with information provided. The SERA ***Repeater Journal*** repeater lists contain certain repeaters which are NOT or have not been coordinated by SERA, or are not operating according to recognized frequency utilization plans. SERA does not necessarily condone or recognize such repeaters as being legal or illegal. They are listed in our indexes primarily to keep our readers informed of all repeaters known in the areas served by The SERA.

Some repeater owners or sponsors allow voice as well as other functions on their machine. Operators should check with owners for additional information about what is allowed, and what features are available. Digital Repeaters with normal input/output (pairs) are listed in the regular FM repeater index. Digital systems operating simplex are not coordinated by SERA and are not on our repeater lists. The *codes* column contains the tone or access code for those repeaters which the owner or trustee has given us written permission and asked that we publish them . Access tones are listed for the reader's convenience both in the By-State, and the By-Frequency listings.

Entries with "#" in front of city indicates repeaters added to this index that have not been coordinated through the local SERA state coordinator. Owners may work with their coordinator to get this indicator removed. Repeaters that have been coordinated but may not yet be on the air yet are listed with "PROP" in the codes column. Owners should notify SERA when on the air.

Repeater owners are reminded to contact their local Frequency Coordinator for assistance in coordination, changes in their listings, or any other requirements. All SERA services are FREE. It is very important that the annual SERA repeater datasheet, sent to all known repeater operators, be accurately updated each year and returned to SERA.

## PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

## PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

# Get The Hammer!

## ... and let's get technical

Randy McKenzie, KK4EJ

### Now I'm an old nerd!

In my early days of tinkering with electronics, namely taking things apart, I had a curiosity about everything. A "Mr. Microphone" was taken apart, rebuilt and adjusted. A Radio Shack Electronics Lab kit started my direction. My mom still talks about being in the bathroom and hearing "Hey could you move, I'm trying to work down here!"

I admit it, I'm a NERD! I like electronic toys! Even on my model railroad I have electronic decoders giving me lights and sound from my locomotives. My first computer ( which I still have and use with BASIC ) was a massive 10 Mbit hard drive and 10 Mhz speed! As I write this issue, I'm using my newest laptop and listening to Rush via WABC on the internet.

Katie, my 8 year old daughter, wanted a Nitendo DS this year from Santa. It arrived and I actually made it two days before I had to try it out. Now I race her at least once a night on the "Mater National" game. Yes I'm still a big kid inside! My favorite toys when I was growing up were erector sets, trains and anything outside. My first computer was acquired after I was out of college. I never had the Atari games, never played the video games or even pinball. Today my kids have the DS, DVD players and COLOR TV in their bedrooms! I've told them about "when I was a kid" and we had three TV stations. They panic over which Disney channel to watch.

The electrical power was out a few weekends ago for a few hours. I spent the time in front of the gas fireplace reading and enjoying a nap. My kids spent the time asking me when the power was coming back on and mad because the TV wasn't working.

I know from being around a lot of HAMS that I'm not the only big kid playing with toys here! I see you when you're at a hamfest and looking over the latest radios or computer gadgets. ( I'm actually even worse at a train show). I don't have a MP3 player or the latest cell phone. My kids are fascinated by seeing my old 45 collection. I found pictures of my old radio station DJ days, actually still spinning records and they were amazed.

I still have my old Icom 2AT portable. I sat it on the desk beside my Kenwood and Motorola business portables. Wow we have come a LONG way!

Maybe this new generation is spoiled? You want features for that new radio? Then fire up the computer and program it in. No more soldering in the wires, checking the schematic for locations, and actually using a tweeker to adjust something. Almost gone are the days of gathering parts and actually building the entire project..... Except for me and a few of you who still want to build.

I sat there last night playing the Nitendo and thought about when I was a kid. My daughter seems to know every detail of the game, even the hidden shortcuts.

What will her kids be playing with? How far advanced will the games be? Our electronics world seems to have no real end. It's faster, smaller and cheaper, doing more and more, each day a new advance in computers.

Cell phones and wireless internet. Standard features now that was only dreamed about a few years ago.

How far will we go with all this wonderful development? The future will be a lot of fun for us big kids, for us nerds, and for tech types....I'll bet you this, no matter how fast, how far or how incredible....the kids will still play with the box it came in longer than the toy itself!

Happy 2008 everyone, I hope this New Year brings you many blessings and some new toys! Now where did I put that box of old tubes....??

# Let's Look At It--- This Way !!!

Marvin Whatley, AA4YW

## A Hair, Perhaps...

Do you remember Dick Tracy? The extremely simple art of that primitive comic strip and the simplistic dialogue of the characters in the early episodes has been the object of comic ridicule for decades and is still given sporadic attention. Many of our classic trite expressions were born there. But some of the nonsense that made the strip delightful persists today in scarcely altered form. Did you know that Dick Tracy invented the cell phone? Well, actually it was a two-way wrist radio. And Chester Gould (the cartoonist) actually claimed credit for the invention. Tracy would talk into his wristwatch to other cops, or to Tess, and coordinate the capture of the criminals. This was in the late forties when a radio was an AC/DC box with a four-inch speaker and five vacuum tubes, and "Ma Perkins" was a favorite Soap Opera. He had an idea and it sounded good, but he had no idea of the character of the problems it posed much less the technology required for their solution.

Throughout the years we have had those wonderful forward-thinking people who came up with "wouldn't it be nice if..." ideas. Other people who actually knew how to do things would work on them and, after a while, there it was. Our technology base is so vast now that we have gotten into the habit of believing that if something is a good idea, it will happen. Our industrial economy seems to bring this about naturally. For a long time the procedure by which good things happened was wading through the plethora of good ideas and working on a few. In the last couple of decades, we have seen some inversion of this. Now we may find the technology group saying, "Hey, look what we can make," and when management responds, "but nobody wants that..." marketing says, "Okay - just give me a minute or two!" And in this whirlwind of progress we have extended the things we want and amplified public perception that if we like something we should have it.

We see the manifestation of this in our political process. A politician knows that his popularity depends on what he can promise his constituents, so after reflection he devises, "If you elect me I will give you 'this'". The normal denizen of our modern culture will think 'this' is a good idea, so election happens. The legislature knows on which side its bread is buttered, so we soon have a bill mandating 'this'. It isn't clear at what point the cost and perhaps the concomitant, unwanted consequences of 'this' get addressed.

Since early Egyptian times, and probably much before, governments have set goals for the community (country). They have defined an objective and marshaled resources toward that end. The Manhattan Project was a great example. JFK proclaimed that a major effort of the country would be to put a man on the moon. In every case the objective was clear but the implementation took the form of specific commitment to particular action where someone was required to do something. It took the form: we are going to do "A" in expectation that "R" will follow, where A is the action and R is the intended result. Governments can pass laws that require action, but they sometimes don't realize that the expected result is only the expected result and might not happen. If highway safety is a concern, the government may pass a law that says that everyone must wear a seat belt while driving, but it can't pass a law that says that highway deaths will decrease. It may pass a law that prohibits (or mandates) sex education in our schools, but it can't legislate that teen-age pregnancy will decrease. Sometimes the law comes close to effecting the desired result and sometimes it doesn't. It's hard to cite an example where the confidence is absolute.

Sometimes when making an acquisition in business the roles of action and result are confounded. Instead of specifying the circuit to be used, you might stipulate sensitivity and noise rejection of a device. (You should be careful to not do both). When the technology is mature and everyone knows pretty well what is involved this may work, but when dealing with large socio-industrial systems,

and the manipulation of factors that are poorly understood, it is a dubious option. One often hears of the importance of educating the public. However, the background and science necessary to really understand issues of major significance are beyond the level of everyone but a very few; so what is actually meant by "educating" is convincing them by a variety of devices of the validity of a particular resolution. When the set of those convinced is large enough, the resolution becomes common knowledge and no one need ever think about it again. In a world where the public is fed highly condensed packets of information reflecting the leanings of particular factions (that are never disinterested) their comprehension takes the form of an assortment of sound bytes that they can recite to each other.

But this is too cynical. The information supporting our important public programs is not just plucked from the air, it comes from "think tanks" and "panels of experts." These experts usually spring from "advocacy groups" that are devoted to making the public aware of important issues. An advocacy group, by the way, is an aggregate of devotees clustered about a core who make their living by having strong feelings about the issue. This often starts with a small study, perhaps at a prestigious university, where the investigator thinks he has a correlation of some significance. His application for a grant (financial support) is honored and studies begin. Let's say, for instance, he thinks that grass pollen may cause premature baldness. (This is a fictitious example.) (I hope.) Well, there is a cadre of people in the government who oversees the funds, and the university assigns the management of the project to an in-house group, and then there are the workers themselves and a group of staff to support them.

Among the possible findings of this study is that grass pollen has nothing to do with baldness. Alternatively, it may be found to be a very important vector that affects the daily life of the whole nation. If the former, all those people in the government now have nothing to do and the university is noticeably weakened and the research group is out of a job. If the findings are positive, however, more money is allocated, the department in the government is more important, the university grows in strength, the research group expands and the workers all get raises. No one wants to cheat or lie, but it is clear that there is a strong incentive to find positive results.

From here, we are not surprised when splinter groups are formed and then advocacy groups where individuals find they can do very well by bringing to the attention of the world the importance of grass pollen. Someone will write a book. When the issue appears before Congress there are volumes of data to be presented and dire predictions of the consequences of inaction. It is unlikely that any group was funded to study the negative side, so there is no alternate advocacy group, and all that the presenters must worry about are the ignorant obstructionists who are trying to deny reality. Inevitably politicians will realize how their interest may be served by getting behind this cause. And that is how, finally, a bill is sponsored and co-sponsored, and a law is passed eliminating future premature baldness in America.

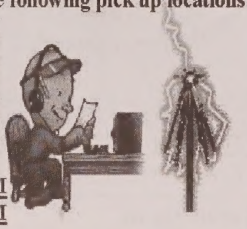
# Dayton Hamvention by Bus

## May 15th, 16th,17th & 18th, 2008

The bus will leave from Burlington, NC (Exit 142) on May 15th at 7 AM with the following pick up locations and times:

| | | |
|---|---|---|
| Greensboro | Four Season's Mall | 7:20 AM |
| Kernersville | Behind Hardee's | 7:50 AM |
| Winston-Salem | Lowe's Parking Lot | 8:15 AM |
| Pinnacle | Exit `29 | 8:30 AM |
| Mt. Airy | I-74 /Exit 8 | 9:00 AM |
| Hillsville, VA | I-77/Exit 14(Citgo Station) | 9:30 AM |
| Wytheville,VA- | I-81/Exit 80 (McDonald's) | 10:00 AM |
| Bluefield, VA | I-77 TBA | 10:35 AM |



The cost will be $250 per person (which covers lodging for 3 nights at the University of Dayton (double occupancy) and the bus). It is advisable to order your Hamvention ticket (good for all three days) in advance for $20 as they will cost $25 at the door. Their address is: Hamvention Advanced Tickets, PO Box 1446, Dayton, OH, 45401.

**A $75 deposit is required by March 1st with the balance due by April 15th.**

Heath TWOER with logo

## Looking at The Heath TWOER

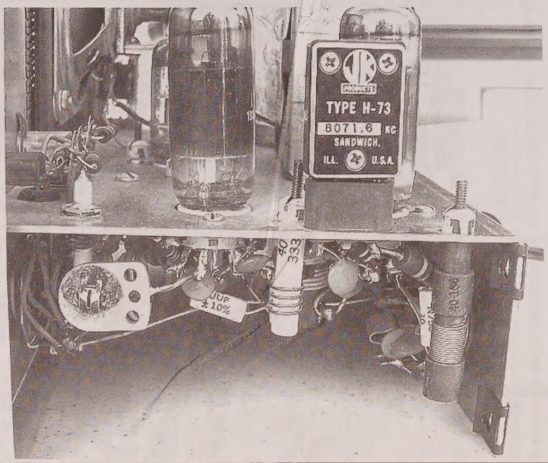
VHF and UHF communication in the late 1950s was dominated by a range of commercially available six meter transceivers. Six meter gear was easier to build and operate on the frequencies above 50 MHz. Lead length was less critical than for higher frequencies. Neutralization was easier to achieve. Many tubes functioned better at the lower frequency utilized for six meters. A 1/4 wave vertical antenna was only 54 inches in length. Something that was very practical when compared to mobile antennas for the HF frequencies. A few two meter transceivers were starting to appear. If you wanted to operate on 220, 440 or higher, it usually meant you'd have to homebrew such equipment yourself.

The popular Heathkit transceiver first appeared in versions for 10 meters and 11 meters (early CB). The super regen receiver was not great for 10 and 11 meters, but was not as much of a problem for 6 meters because of the greater available bandwidth. A more popular version for six meters soon evolved and was the choice for mobile operation. Repeaters did not exist in those days, so mobile operation was limited to simplex operation. Distant communication was made possible by hill-topping, or taking advantage of E-Skip propagation. Such propagation, although it did occur, was rare for two meters. The final evolution of the "Benton Harbor Lunchbox" was the TWOER. Although this transceiver did not share the wide spread popularity of its brother transceivers, it still attracted a following of users eager to explore even higher frequencies. Here was a simple, but practical, transceiver which allowed amateurs to explore 2 meter operation at an economical cost. Its 5 watts of power was adequate for local and regional operation as a base station if a good beam antenna was employed. The higher frequency meant higher gain antennas were more practical, and could be positioned with low cost TV type antenna rotators. Although TWOERs were used mobile, the range for simplex was just a very few miles. I do recall comparing a SIXER and TWOER for mobile operation and found the SIXER provided a better communication range. The real limitation was the fewer number of hams with 2 meter capability.

Still, the Heathkit TWOER was my entry transceiver for 2 meter amateur radio communication. Today, two meters is of course the most popular VHF-UHF band for hams. In the late 1950s, this future popularity for 2 meters was not envisioned by many hams.

A "pair" of Heathkit TWOERS. Note the Turner microphone as supplied with the transceiver.

Heath TWOER.



Side view showing top and bottom of chassis. Note the 8 mcs FT-243 type crystal used.

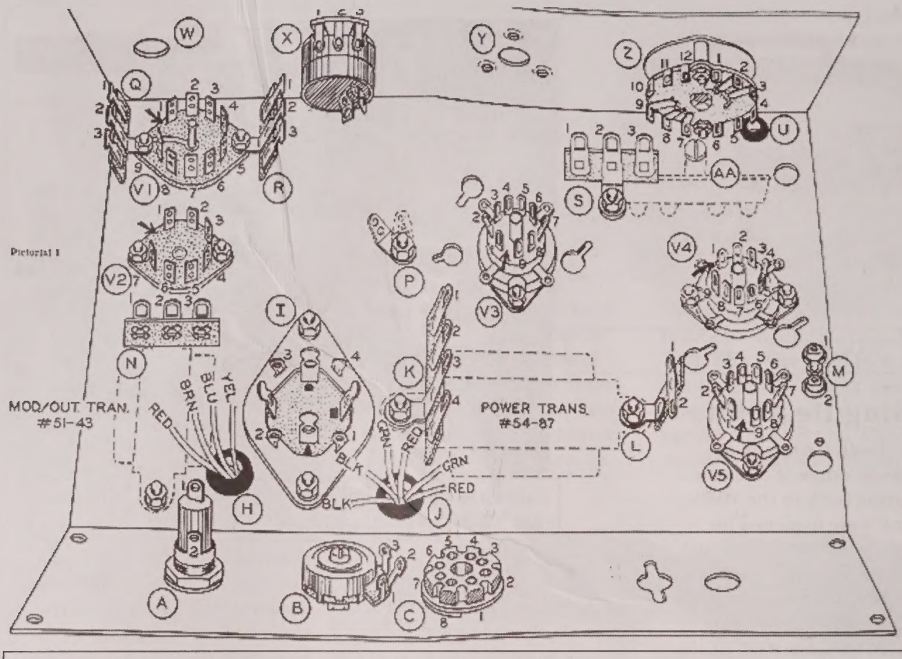
## Building Heathkits

The Heath Company offered a wide range of electronic kits starting back in the 1950s, and many were designed for amateur radio operators. Some were simple kits such as phone patches, SWR meters and field strength meters. Some were much more complex such as the famous DX-100 HF transmitter. But all had one important ingredient. Each kit came with excellent documentation and great tips on how to build the kit and solder the components into a viable electronic piece of equipment. A diagram from a kit manual had four separate drawings on how to solder a wire (or electronic component lead) to a barrier terminal strip. The first drawing showed the lead being secured with needle nose pliers; the next drawing showed the soldering iron being brought in contact; the third followed through with solder being applied; and the last depicted the final solder flow process that completed the task. Many hams got their first practical instructions on soldering techniques from a Heathkit manual.

The manuals had large pictorials showing what each mechanical and electronic part looked like. The parts list was broken down into function with complete documentation of every thing involved. Many of the well written and organized assembly manuals had a good overview on how to solder and assemble the kits, with such clues as how to organizing the electronic parts in a convenient manner for assembly. One great tip was placing the leads for the electronic parts in the edge of a cardboard container to help in organizing the components.

The assembly manuals were not just copies of each other regarding preliminary instruction techniques. If the kit involved tube technology, then instructions regarding how to identify vacuum tubes with precautions on dealing with high voltages were included. As technology advanced, details on solid state devices included how to identify and determine the leads for bipolar transistors, FETs and integrated circuits were included. Heath even indicated suitable replacement semiconductors.

More complex kits requiring the use of an oscilloscope had instructions on how to use the instrument and how to read and

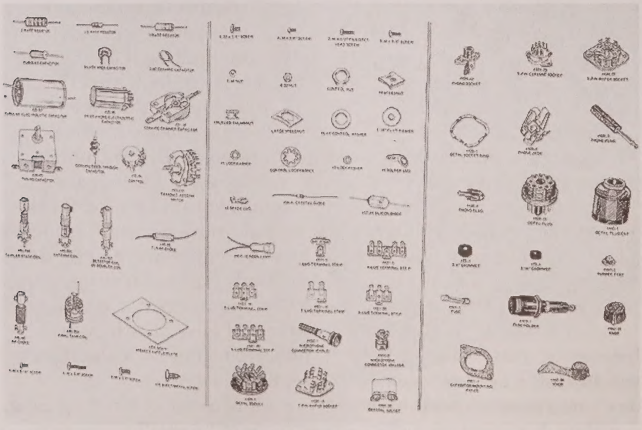


Example of layout in manual of parts by Heath (this one is for a Sixer), showing location for mounting the parts.

interpret the waveforms. For kits involving RF transmitters, instructions on how to properly neutralize an RF amplifier were detailed along with excellent diagrams. The step by step process for aligning the oscillator, any intermediate stages and the final RF amplifier were detailed along with a complete check list to follow.

Heath always had excellent schematic diagrams that were easy to follow and read. There was no doubt in identifying a part in the circuit diagram. So many schematic diagrams with equipment today (and few products even have one) are much too small to read and interpret.

And if the completed kit did not work for some reason (and this was rare), Heath provided a telephone service with "a real person" on the other end to help. This was the era before digital telephones, so there was no press 1, 2, 3, 4, etc for more help! The legend of Heathkit lives on today at hamfests with displays of equipment offered for sale.



Heath always identified the various components used in a kit.

# HI PRO REPEATERS

## Hi Pro "R1" Repeater

**144 MHz, 222 MHz or 440 MHz**

Here is a compact **LOW COST** repeater (less controller) priced at just $699. A 35 watt VHF (2-meter) repeater with a computer controller, voice synthesizer, auto patch, auto dialers, user functions, etc. is priced at $1,179. This is not a kit, but a complete repeater with a two-year warranty. 222 and 440 MHz versions are also available!

## Hi Pro "E" Repeater

**144 MHz, 222 MHz or 440 MHz**

The Hi Pro "E" is the choice if you need a repeater with a built-in power supply, plus room for an extra receiver, transmitter, small duplexer and controller. The front panel provides status indicator lights, a speaker, a microphone connection, control switches, etc. Prices start at just $1,450!

If you need a receiver or transmitter as a board or in an enclosure, we can provide them. These are the same high-performance units that are used in all of our repeaters. All have our new QUALITY AUDIO AND STABLE OSCILLATORS.

**EV1 VHF Transmitter**

**RV4 VHF Receiver**

# Tech Class in Pittsylvania County

Dewey L. Jones, President
Southside Amateur Radio Club

Tuesday, November 13, 2007 was test day for the Amateur Radio Technician Class. Sponsored by the Pittsylvania County, COMMUNITY EMERGENCY RESPONSE TEAM, (CERT). Ten people attended a 7 week class which ended with all 10 earning a license. Classes were held at the Tunstall Middle School. There were also 2 that tested for an upgrade to General Class. After earning their technician class, 2 others tested and also earned a General license. This gave a total of 4 General and 8 Technician operators. Ages for the students were; two at 11 years, one 13 years and one 17 years old. The remainder were adults.

Instructors were Dewey Jones; assisted by Greg Motley of the SOUTHSIDE AMATEUR RADIO CLUB. Both are also members of CERT.

Test team was the W4VEC Group from the Rockingham County Amateur Radio Club from Rockingham County in North Carolina.

Earning new and upgraded tickets were:

Donna Motley, KI4KOP
General

Bryant Pearce, KI4EJW

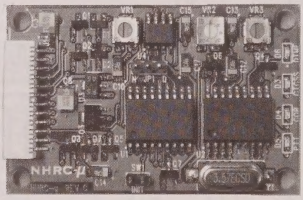
NHRC
REPEATER CONTROLLERS
NHRC-μ (Micro)
Ultra-Compact
Repeater Controller/IDer



(actual size 1.25" x 2.00")

NHRC-μ Features
- Repeater Controller, IDer, or Beacon modes
- High and low-going COR and CTCSS inputs
- Extremely compact
- "Intelligent" ID algorithm
- Programmable CW ID speed and pitch
- 21 Control operator settings
- 4 User commands
- 5 Saved setups
- Touch-Tone remote control and programming
- Windows™ based, serial port programming
- Hang timer, ID timer, Timeout timer, and CW messages stored in non-volatile memory
- Jumper-selectable receiver deemphasis
- LED CAS, CTCSS, PTT, and DTMF indicators
- Extremely low power consumption

The NHRC-μ ("Micro") is a compact repeater controller/IDer designed for easy installation in close quarters. The NHRC-μ can function as a conventional repeater controller, as an IDer for repeaters, or as a beacon controller. It can be easily mounted with double-sided foam adhesive tape, and connected to the equipment with flying leads, allowing for easy installation in almost any equipment.

The NHRC-μ is programmable by sending DTMF sequences over the air, or by computer with a serial port connection and the free NHRC-μ programming software. The CW ID, hang time, ID timer, timeout timer and courtesy tone beeps can all be programmed by the user. All programming is stored in non-volatile EEPROM memory.

The NHRC-μ (Micro) (Assembled and Tested): $119
plus shipping and handling

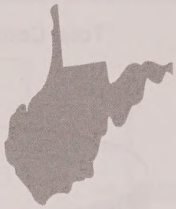
# West Virginia



Richard Clemens, KB8AOB

Greetings from West Virginia!

Sorry to miss the last issue but it seems that the RJ deadlines happen at the least opportune moments ☺ There is a solution – write an article or two ahead of the deadline date – that method of planning has never been a feature of my life and given my age is unlikely to become routine at this point.

What I do want to share this issue is a few unrelated items of interest – at least to me – and hope you will find it all worth reading. I must first say that this will be one of – but hopefully not the – last article that I plan to prepare for the RJ. It has been fun the last few years but I find it more of a chore each time to find a topic. Additionally I have developed a couple of new hobbies and am find less time for some of the old ones. So if you are reading this and saying to yourself – I could do better than that or Gee, I have lots of time and love to write – step up as I have got the spot for you!

My newest money pit is woodworking. I had tried it a long time ago but in the days when I needed to buy the cheapest tools available and as a result was never happy with the product. I gave all those old tools to one of my sons and bought all new and top-of-the-line gear for myself. That coupled with my wife's great idea to heat the family garage has kept me going many an evening as I have been creating toys for my twelve grandchildren. Certainly no major projects are likely in the future but building toy cars and trucks, puzzles, and bird feeders has forced amateur radio to the back seat. I still operate a great deal on HF but my 2-meter equipment often fails to see any activity.

My interest in HF for the past several years has been focused on digital modes with heavy interest on PSK and some of the other new techniques that I find very fascinating. The blend of computers and amateur radio seems to have a better hold on me than 2-meters. Unfortunately, I have not seen too much activity, at least in this part of West Virginia, using digital modes as mentioned in earlier articles.

You may have been reading about the "one laptop per child" program (www.laptop.org) and their goal to produce a $100 computer laptop that could be used in developing countries for educational needs. While many have criticized the concept and judge that such children have more critical needs than a laptop, I support the concept as it would provide a vision for youngsters that might never have such ideas.

When the opportunity to "Give One Get One" (G1G1) was announced I was among the first to signup. While I understand that program is now over, you can still give to the effort to provide a laptop to some child in the world. This cost is $200 as the original target price did not happen.

For a donation of $400 the early G1G1 program provided for the donor to receive a laptop as well. My laptop arrived at the end of December and it is absolutely amazing what it does. Let me point you to the web site listed above or to (wiki.laptop.org) for all the details, including photographs, specifications, and many other links showing how it works.

The unit is small, can be solar powered, has three USB ports, built-in camera, runs a favor of Linux, has wireless, and is just eager to learn about amateur radio. You can write software for the unit with Python and it is fully an open-source project both hardware and software. I plan to use my unit as a very convenient and rugged travel computer but there would be many possible applications for emergency services. Recent news indicates there may be other such machines to follow at even lower prices. Right now I am eager to find another G1G1 donor as I would like to see the mesh network operate and try out some of the activities (programs) that require two or more units. The unit contains a number of very innovative educational activities and many more are being written and posted to the web.

REMINDER: Mark those calendars now: 50th ARRL WV State Convention and ARRL Roanoke Division Convention August 23-24, 2008 at Jackson's Mill. Visit www.qsl.net/wvsarc/ for ongoing details. I will bring my XO laptop to the Mill and even provide a demonstration if there is enough interest.

*For WV coordinations, please see page 41.*

"The Raleigh Hamfest"

## *Two important changes...*

# The day:
# SATURDAY

# The date:
# APRIL 12

In our November, 2007 *Repeater Journal* ad we told you that *RARSFest* was moving to Saturday, March 29, 2008. At that time, the March date was the only available Saturday in the desired building, so RARS took that date knowing of existing conflicts. Right after the *Journal* ad cutoff, our building's schedule changed, and RARS was offered the opportunity to move to April 12, 2008, our traditional weekend. That choice was easy.

Why Saturday after all these years? Many of our attendees and vendors have long suggested it, while many others were happy with Sunday. We wrestled with the idea every year. This year, a new fee schedule for our building would have made a Sunday hamfest prohibitively expensive, so the decision was made for us.

The hams and ham dealer community have been very supportive of our new day and date. We hope to see *you* in Raleigh on April 12!

# RARSFest 2008
## Saturday, April 12

**8 AM to 3:30 PM**

**Exposition Center**
**State Fairgrounds**
**Raleigh, NC**

***Hamfest, Computers,***
***Huge Electronic Flea Market***
***& ARRL NC State Convention***

*sponsored by the*
***Raleigh Amateur Radio Society***

**Tickets: $7**
**($6 advance)**

**order online at:**
**www.rars.org/hamfest**

TALKIN 146.64

**Everyone told us the new Expo Center location is great!**

**'07 attendance was up, and we'll be in the same place in '08. Please help us spread the word and keep on growing!**

- Hamfest Prizes
- New Equipment Dealers (all major brands)
- VE License Testing - 9 AM Sharp!
- Forums and Meetings
- Contests
- QSL Card Field Checking available
- Special Event HF Station *you* can operate
- Hands-on construction projects
- ***New: Youth Lounge.*** Meeting area, activities and prizes for young hams and non-hams
- Family Activities: *Renaissance Faire* *on the fairgrounds, just behind the hamfest; movie theater, shopping, NC Museum of Art* nearby
- *Free* NC Fairgrounds Flea Market huge, free general-merchandise Flea Market on the grounds
- *Free* Parking. Paid overnight camping available
- Friday Night Supper for Vendors

extra prize tickets available at the fest for $1 each

*see www.rars.org/hamfest for activity details*

- **50,000 square feet of air-conditioned indoor space!** Sorry, the Fairgrounds does not permit outdoor sales/tailgating
- **Drive-in load/unload** Friday afternoon, Saturday 6 to 7:30 AM

---

**Pre-registration Form**[RJ]

(Payment *with self-addressed, stamped envelope* must be received by **April 5th**, 2008)

**Order Tickets and Tables ONLINE at www.rars.org/hamfest**
*(secure credit-card payment)*

Name:_____ Call:_____

Address:_____

City:_____ State:____ Zip:_____

# My Word!

Tom Gallagher, N4IOZ
*SERA Repeater Journal Editor*

Usually, I keep my opinion out of this magazine. The Repeater Journal isn't about me, or what I think--- it's about the Radio Amateurs in the eight SERA states. However, this time I'm going to use the privilege of being editor to voice my opinion and let you know what's on my mind.

First off, I'm really lucky. To start, I've got the help of a bunch of great folks who do almost all the writing for me, issue after issue. Lately, though, I've been hit with a bit of bad luck: both my Kentucky and West Virginia writers have realized that they can't keep writing for the R-J and do everything else that has to be done in their lives. So, if you'd like to get a bit famous and you live in West Virginia or Kentucky, and you don't mind writing, please drop me an email at <editor@sera.org> and I'll give you more details. Don't worry too much about your grammar, punctuation, or whatnot: I'll share my luck with you; because our co-editor Jean Marie, KI4DDC, will proofread everything we write and make sure we make our high school English teachers proud.

My other "call to the pen" springs from the events that occurred at recent SERA Board Meetings. What's been taking a lot of the time at these meetings has been the task of trying to figure-out how to accommodate the "new kids on the block" who want to use APCO P-25 and D-STAR systems. The trouble is, our current coordination guidelines were drawn up for use with "plain vanilla" FM signals. The newer systems have a narrower bandwidth than we've used in the past--- sort of like the shift from AM to SSB years ago--- and coordinators have to consider things like "spectral power density" and the effect the new modes have on co-channel and adjacent-channel users. The words "a different kind of animal" were used several times when comparing wideband-FM, P-25, and D-STAR. Yes, we're going through a period of change. Over the next few years it's going to be very important for us to "share and play well with others," as it said on your kindergarten report card. With the passage of the newest resolution by the SERA Board, we're making progress. Please, let's all be considerate. In the words of the old-timers, "don't be a LID."

**4th Annual**
**Rockingham County Hamfest & Computer Show**

**Sponsored By:**

*Rockingham County Amateur Radio Club Inc. N4IV*

**Saturday, May 10, 2008**
**8:00AM to 3:00PM**

Conveniently located off Freeway Drive in Reidsville, NC
( Community Baptist Church at 509 Triangle Rd. in Reidsville )

# Life is a JOURNEY. Enjoy the ride!

COMET and Maldol

## Base Antennas

*CHA-250B VSWR graph*

*"One person can effortlessly raise the antenna at night when no one can spot it, and take it down before daybreak. This antenna is also a great choice for portable operations, such as quick and easy mini-DXpedition to a campground or a nice tropical island! In short, the Comet CHA-250B is simple to assemble, painless to elevate and is easy on the eyes, while at the same time getting you on 6 meters thru 80 meters without the requirement of an antenna tuner and ground radials. You'll even be able to work some DX while you're at it!" – Dan Dankert N6PEQ*

**COMET NEW CHA-250B BROADBAND HF/6M GROUND-PLANE ANTENNA**
A newly designed broadband vertical with NO GROUND RADIALS. EXTREMELY easy to assemble, requires no tuning or adjustments and VSWRs under 1.5:1 from 3.5-57MHz! • TX: 3.5MHz – 57MHz • RX: 2.0 – 90MHz • VSWR is 1.5:1 or less, continuous • Max Power: 250W SSB/125W FM• Impedance: 50 Ohm • Length: 23' 5" • Weight: 7 lbs. 1 oz. • Conn: SO-239 • Mast Req'd: 1" – 2" dia. • Max wind speed: 67MPH

**COMET GP-15 TRI-BAND 52/146/446MHZ BASE REPEATER ANTENNA** Gain & Wave: 52MHz 3.0dBi 5/8 wave • 146MHz 6.2dBi 5/8 wave x 2 • 446MHz 8.6dBi 5/8 wave x 4 • Max Pwr: 150W • Length: 7'11" • Weight: 3lbs. 1oz. • Conn: Gold-plated SO-239• 2MHz band-width after tuning (6M) • Construction: Single-piece fiberglass

**COMET CX-333 TRI-BAND 146/220/446MHZ BASE REPEATER ANTENNA** Gain & Wave: 146MHz 6.5dBi 5/8 wave x 2 • 220MHz 7.8dBi 5/8 wave x 3• 446MHz 9.0dBi 5/8 wave x 5 • Max Pwr: 120W • Length: 10'2" • Weight: 3lbs. 1oz.• Conn: Gold-plated SO-239 • Construction: Fiberglass, 2 Sections

**COMET GP-3 DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA** Gain & Wave: 146MHz 4.5dBi 6/8 wave • 446MHz 7.2dBi 5/8 wave x 3 • Max Pwr: 200W • Length: 5'11"• Weight: 2lbs. 9ozs. • Conn: Gold-plated SO-239 • Construction: Single-piece fiberglass

**COMET GP-6 DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA** Gain & Wave: 146MHz 6.5dBi 5/8 wave x 2 • 446MHz 9.0dBi 5/8 wave x 5 • Max Pwr: 200W • Length: 10'2"• Weight: 3lbs. 8ozs. • Conn: Gold-plated SO-239 • Construction: Fiberglass, 2 Sections

**Maldol HVU-8 ULTRA-COMPACT 8 BAND HF/VHF/UHF VERTICAL ANTENNA**
80/40/20/15/10/6/2M/70cm Only 1/2 the traditional size and weight of vertical HF antennas, and it includes 2M/70cm! Unique radial system rotates for balcony installations, the radials can all be rotated to one side. • HF and 6M: 1/4 wave-length • Gain 2M: 1/2 wave-length, 2.15dBi • Gain 70cm: Two 5/8waves in phase, 5.5dBi • Impedance: 50 Ohm • Max Power: HF 200W SSB • 6M–70cm: 150W FM• Conn: SO-239 • Height: Only 8'6" • Weight: 5lbs. 7ozs.

**COMET GP-9 / GP-9N DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA**
BEST SELLER! • Gain & Wave: 146MHz 8.5dBi 5/8 wave x 3 • 446MHz 11.9dBi 5/8 wave x 8 • Max Pwr: 200W• Length: 16' 9"" • Weight: 5lbs. 11ozs. • Conn: GP-9 Gold-plated SO-239 • GP-9N Gold-plated N-type female • Construction: Fiberglass, 3 Sections

**COMET NEW H-422 QUAD-BAND HF DIPOLE** Compact 40/20/15/10M "V" or Horizontal Dipole • Max power: 1kW SSB • Length "V" Dipole: 24' 3" • Horizontal Dipole: 33' 10" • Shipping length: 79" • Weight: 11 lbs 14 ozs • Wind Load: 3.02 sq feet • Required mast size: 1.5" - 2.5" diameter • CBL-2000 2kW Balun included • Simple installation, band tuning and profile change

DIGITAL

# FEAR OF COMMITMENT?

(Actual Size)

## IC-91A

Analog/Digital Upgradeable

2M/70CM @ 5W

Wide Band Receiver w/Dual Watch
495kHz - 999.990MHz

1300 Alphanumeric Memories

Weather Alert

Optional D-STAR Digital Voice & Data

## IC-91AD

Analog/Digital Ready
All the IC-91A Features Plus:

D-STAR Digital Voice & Data Ready

One Touch Reply

Voice Recorder & Auto Reply Message

Position Exchange

DX Communication Via the D-STAR System
(2M & 70CM D-STAR Repeaters now available at your authorized Icom dealer)

# ANALOG & DIGITAL.

It's not just digital. Analog is there, too. Both capabilities in one radio. And what a new radio it is! With infrastructure and a family of D-STAR compatable radios, you're not buying an experiment. That said, digital is the future of amateur radio. And experimentation is a foundation of ham radio. So now you have to ask yourself, "do I pick up the analog only '91A version, which is optionally upgradeable to digital? Or do I take the '91AD, which offers digital right out of the box?" It's your choice. Commitment can be a wonderful thing.

**Coming soon to your authorized Icom dealer!**
